इंदियन एकेडमिक पार्टनर
INDIA'S ACADEMIC PARTNER

FROM THE PRINCIPAL'S DESK

Mr. G. Azhar
Principal

These two months have been the testing months with the students coming back to the school and taking tests and examination in offline mode.

I believe that having quality, inspirational and passionate teachers is essential to a school's success. To borrow John Hattie's words; **"teachers should build classroom climates where errors are welcome, student engagement is the norm, questioning is high and students gain reputations as effective learners."**

To equip our students for the new academic session we had bridge course to fill the learning gap due to online mode during the 2 years of pandemic. Lot of engaging activities in the classrooms ensured that our students are active participants in their learning.

We do everything in our school to ensure that our students are not afraid to try anything new. Students participated in the CCA activities and proved that participation is more important than winning.

SCHOOL CELEBRATIONS & ACTIVITIES

School as a community celebrated few activities/competition/celebration which includes parents, guardians and students to involve themselves and be a part of our school family.

Cooking Competition

As a part of Mother's Club activity we had conducted the cooking competitions for mothers to bring out their innate talents and recognise their efforts of being a hard working mother who never gets tired. Hats off to our mothers.

Cleanliness Drive

We also conducted the Cleanliness Campaign at Reodhar, and nearby villages. Students had rallies with social messages and presented roadplays based on gender equality. Local people too participated in this campaign in large numbers..

Open House

After the successful completion of academic year 2021-2022 we had a Open House – Parents Teachers Meeting to discuss about the child's progress with their parents and areas of improvement required. It also gives us immense pleasure to take the valuable feedbacks from our esteemed parents for future developments required in school.

Welcome Day

School welcomed the students for the new academic session 2022-2023 with fun filled activities to make them feel special.

March & April Newsletter

Bridge Course

Bridge course is one of the most important part in schools as it will help the students to have a strong foundation of the previous year before they move to new academic session. All the important concepts were cover through activities based learning so that students can learn by doing and involving themselves.

Co-Curricular Activities

Co-curricular activities offer the students an opportunity of thinking unusually and getting the innovative ideas of their own. Participation in these activities also aid a student's social skill development, emotional development and overall personality development.

We conducted activities such as - Spot the Difference, Dance, Essay Writing, Elocution, Role play etc.

Teachers Orientation Programme

We believe in regular professional development, up gradation of skills, and learning new strategies for teaching. Sarvag International School has conducted teachers' orientation programme for our teachers of Grades 1 and 2 at SIS Unjha to introduced them to the books of Grade 1 and 2 based on the NEP 2020.

Parents Orientation Programme for Grade 1 and 2

We believe in partnering with our parents and discussing with them the changes we bring in. The books were introduced to the parents by Mr. Suraj and Ms. Caroline (Education India). They explained the features of the books and highlighted how it will be implemented through different activities and integration of subjects. Parents queries were also addressed.

PARENT'S TALK

Yash Soni

My son, Yash Soni has been studying in Sarvag for almost 8 years and the kind of education he is receiving here is phenomenal. I would like to specially mention the supportive role Principal and teachers have played has made my kid what he is now. Continuous follow up of his studies and attendance in class makes the school different than others. My son is appearing for class 10 examination this year and I'm sure he will come up with flying colours in exam. I wish all the best for the future of the school.

TEACHER'S TALK

Education is the process which aids learning, acquiring knowledge and skills to one's character. Education upgrades the thinking of society and helps to uproot social evils. It helps the uniform development of a country by fighting the inequalities of society. We can have education by various methods, like teaching, training and research activities etc. Storytelling is a method of education which helps to pass the knowledge from one generation to another.

Science is the action to find out any fact regarding the natural world. Science is both boon and curse for living beings. Science gives accurate facts, formulas, laws and theories. Science has many major fields like chemistry, physics, biology etc. Science takes the help of mathematics to prove the facts and findings. Another method to prove the theories is by experiments and observations. In science, experimentation is the process of fact-finding by 'Research'.

A science teacher can actually teach several science related topics depending on the grade level. A science teacher can specialize in a particular area, but should be well versed in all things science. Science teachers need to be able to break down complicated science topics into understandable parts for students of varying ages and abilities. A science teacher should also be willing to perform, set-up, and explain experiments while ensuring safe practices for all students.

At Sarvayog International School, we motivate our students by theoretically and practically. Our main object is overall development of students.

Mr. Kundan Kumar
